## GENERAL INFORMATION

**I**N THIS catalog The Voos Company introduces a line of *Stainless* Kitchen Appliances which should appeal especially to dealers who prefer to sell *quality* merchandise. This is an important addition to the Voos line of can openers, cutlery and other products which have served for years to build up the Voos reputation for service and quality.

Note the general specifications of this line of Kitchen Appliances:

1. All blades and stems are of highest quality genuine *Stainless Steel*. They need no scrubbing or scouring to keep clean. Just dip in sudsy hot water, rinse and dry. Moreover, they will not *tarnish, rust or stain*.

This is the most important contribution to kitchen sanitation and labor-saving in a generation.

Voos Kitchen Utensils can also be furnished in high grade carbon steel, heavily nickel plated.

Nickel plating is done over a plating of copper which gives a high degree of rust resistance to the utensils.

2. All handles of Voos kitchen utensils are given four coats of enamel making for lasting beauty, lustre and protection. All handles are made in white, red, blue, yellow and green. Black handles can be supplied on special order. *Unless otherwise specified in your order, white handles will be furnished.* If colored handles are desired, add to the number of the item the letter indicating the color, as R-red, B-blue, Y-yellow, G-green, AC-assorted colors.

All kitchen utensils are packed one dozen in a plain box of a single color or assorted if specified.

The Voos Company is now manufacturing the favorably known line of *Empire* Paring and Grape Fruit Knives. They are made from high grade pocket cutlery *Stainless Steel*, and are as carefully treated as the blades of pocket knives. Housewives appreciate their lasting keenness and freedom from rusting or staining. **Their quality is supreme.**

The Voos Company calls attention to the other products of their manufacture which are shown in this catalog. In addition to their popular can openers and mincers, are shown a few illustrations from their line of pocket knives for advertising purposes.

The Voos Pruner has been tested by gardeners and nurserymen everywhere and has proved its superiority to anything of its kind on the market.

### Packing:

Above is shown one of the many compact and beautiful cartons displaying one dozen can openers. They take up but little space and make many sales.

Customary packing is in 1, 2 or 3 gross cases according to the size of the item. Shipments for export are securely packed in wood boxes lined with waterproof paper and bound with metal strapping.
